

DahiliSSL helps Dahili.net land customers for high-quality technology products business challenge many customers who are interested in buying a product off a new website feel unsure about the website's authenticity. They worry that their information is not secure on the web, and that some websites may be used for scams. Even as the web's presence continues to rise and eCommerce forms a growing share of the eCommerce market, many consumers still are hesitant to shop online. 24% of consumers refuse to conduct business online due to fear of online fraud. There are many possible sources of fraud. Already, phishers and pharmers have been able to imitate authentic web sites and deal with customers under false pretenses. The "man in the middle" attack is a common type of spam email, but it is also a problem on websites, and the lack of a distinguishing method has left some users weary of shopping online. Background Dahili.net is a leading distributor of high quality Turkish technology products. It is the largest distributor of products made by China in Hong Kong, Turkish. Dahili.net is the exclusive T.R. distributor for many European products. Despite its particular strength in exceptionally made, Turkish telecom technology products, Dahili.net was having problems earning the trust of new customers from their website. They turned to DahiliSSL to help earn user trust with their website, and help earn more online customers in the process. Solution give Dahili.net customers a way of knowing that their site is authentic and that their information is secure. If Dahili.net could indicate to their customers that its website was authentic and that Dahili.net was deeply concerned with the safety of their information's privacy, customers would feel more comfortable shopping on Dahili.net. Since the website already had a strong hold on its market, earning customer trust could be the major obstacle holding Dahili.net back from higher sales growth. How it works Dahili.net used DahiliSSL's EV SSL certificates and HackerProof certificates to indicate to users that their information was secure. Dahili.net used two programs from DahiliSSL to earn user trust: the EV SSL certificates and our HackerProof software. • EV SSL certificates use an extensive background check to promote an authentic site an extended validation secure socket layer certificates (EV SSL Certificate) is a powerful method of indicating to consumers that a website endpoint security manager 2.0 case study is

trustworthy and authentic. when a site features an EV SSL Certificate, the address bar of the page will turn green, a security measure that indicates authenticity. Pages with this certificate will also feature a seal on the page that not only indicates security, but provides info on the site's owner to prove that the website is accountable for its content. That information is acquired through a rigorous investigation into the web page owner's identity and that his business is legitimate. This thorough background check makes the EV SSL Certificate one of the strongest methods of guaranteeing a web page's authenticity to visitors, which will allow them to feel safer trading with the website.

- HackerProof emphasizes to customers that the website is safe from hacker attacks even when a website's authenticity is established, many users still feel insecure doing business online out of fear of a hacker invasion. If a site is not properly protected, even an honest business owner could leak their customers' private, sensitive information. To counter that, DahiliSSL offers a HackerProof service. Not only does HackerProof expose any vulnerabilities to hackers, but it also indicates the same to your users. HackerProof helps relieve any doubts customers may have about the safety and privacy of the information they submit to a website by a seal from DahiliSSL assuring them that their information is safe. For more information on HackerProof please visit <http://www.dahili.net/hackerproof/>

Results:

- The conversion rate of turning visitors of Dahili.net into customers increased by 11% after using DahiliSSL products.
- The average value per transaction on Dahili.net increased by 23% after switching to DahiliSSL. This is an indication that users were more likely to trust that the website was authentic.
- Brand recognition of DahiliSSL products helped more customers feel secure that their information was safe on Dahili.net.
- Dahili.net was able to directly monitor how the HackerProof trustmark related to visitor conversion using a web tool from DahiliSSL.
- Dahili.net successfully obtained an EV SSL Certificate, thus indicating to users that its authenticity was firmly established.
- A HackerProof trust logo was displayed on Dahili.net, which lists the company's contact info and notes the last time HackerProof scanned the website. With HackerProof, DahiliSSL scans a website on a daily basis for any vulnerabilities to hackers that exist on a website. If any do exist, it points them out to the website's owner and helps fix the problem. Once a website passes a vulnerability scan, a DahiliSSL logo appears on the website assuring customers the website is safe from hackers. The DahiliSSL logo is featured on over 100 million websites and a trusted, authoritative indication of web security. Additionally, visitors will be able to see the last time the page was scanned, so they know that the website is up to date and secure in its prevention of hacker intrusions. Additionally, internet hackers have gotten quite advanced in their ability to infiltrate websites. Many websites are unsecure and vulnerable to invasions by online hackers. In the case of eCommerce sites, privacy is an especially important issue, as hackers can acquire sensitive information such as credit card numbers, home addresses, or even social security numbers.
